

SoftServe

ANALYTICS AS SERVICE

Scale your ability to help your business

OVERVIEW

We enable organizations to turn data into actionable insights without being limited by internal capacity. While many companies already have access to valuable data, they often lack the time or resources to fully leverage it. By extending your existing data team, this service provides the expertise and scalability needed to continuously deliver insights, dashboards, and data products, which helps you move faster and make more informed decisions.

WHY IT MATTERS

Demand for analytics exceeds capacity, limiting timely insights delivery.

Backlogs delay incoming requests and slow critical business decisions.

Teams need timely answers to act and compete effectively today.

Without the right model, analytics becomes a major operational bottleneck.

OUR CAPABILITIES

TURNING

analytics into a reliable, scalable ongoing capability system

DELIVERING

insights faster and more consistently across teams

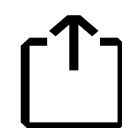

REDUCING

backlog and improving overall responsiveness significantly today

BUILDING

reusable, scalable, high-impact data products, not reports

SHIFTING

from reactive requests to structured, continuous delivery

HOW WE WORK

Business Understanding

Clarify needs, define KPIs, and align with business goals

Data Preparation

Ingest, transform, and model data for analytics use

Analysis & Insight Generation

Deliver actionable insights and answer business questions

Visualization & Reporting

Build dashboards and reports for decision-making

Data Product Development

Create reusable, scalable, high-impact analytics assets

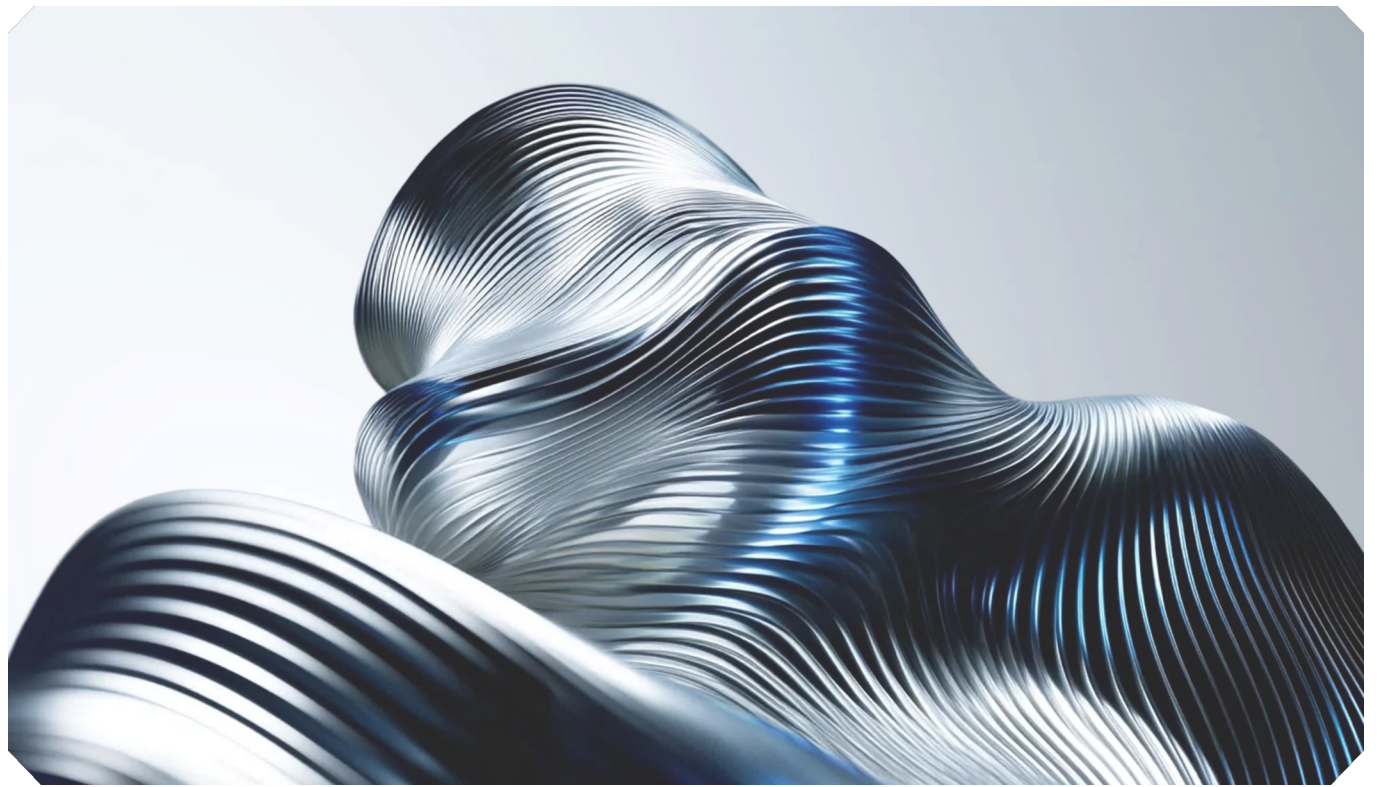

Continuous Delivery

Iterate, improve, and support evolving business needs

WHAT YOU CAN EXPECT

- 1 Continuously delivered insights and dashboards
- 2 Reduced backlog and faster response times
- 3 Consistent quality and standardized outputs
- 4 Reusable, scalable data products
- 5 Aligned business needs and data delivery

ENGAGEMENT OPTIONS

	SMALL TIER	MEDIUM TIER	LARGE TIER
Best for	Targeted analytics and quick wins <ul style="list-style-type: none"> Dedicated BI expertise Support for dashboards and reporting Fast response to business requests 	End-to-end analytics delivery <ul style="list-style-type: none"> Business analysis and requirement definition Data engineering and transformation Dashboard and insight delivery Delivery coordination and prioritization 	Enterprise-scale analytics <ul style="list-style-type: none"> Advanced analytics and data product development UX-driven dashboard design Full delivery coordination and governance Support across multiple teams and domains
Outcome	Consistent delivery of insights with minimal overhead	Structured, scalable analytics delivery across use cases	Mature, scalable analytics capability aligned with business needs

SOFTSERVE BI & ANALYTICS EXPERTISE

SoftServe helps organizations modernize enterprise BI ecosystems across Power BI, Tableau, Looker, and cloud analytics platforms.

With deep expertise in reporting modernization, semantic modeling, governance, self-service analytics, and AI-enabled BI, we deliver scalable analytics foundations built for Microsoft Fabric and enterprise adoption.
