

Data Agents Express

Make your AI accurate

OVERVIEW

Most large language models are powerful but inherently generic, often lacking business context and precision. By connecting them to your enterprise data, this service enables more accurate, contextual, and actionable responses. Using structured data models and conversational interfaces, it turns AI into a business tool, delivering tailored data agents in weeks.

VALUE

Context-Aware AI

Faster-Time-to-Value

Business-Ready Insights

Accelerated Experimentation

WHY IT MATTERS

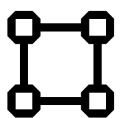

Generic AI often fails to deliver meaningful business value.

This leads to low adoption and limited business impact.

Without access to your data, it lacks context, accuracy, and real business relevance.

With the right data foundation, AI becomes a practical and scalable business tool.

OUR CAPABILITIES

CONNECTING

AI to your enterprise data for real business context

ENABLING

context-aware, accurate responses for everyday decisions

DELIVERING

working data agents aligned to real business use cases

WHAT WE COVER

Use Case Definition

- Identifying high-impact scenarios for AI-driven interaction
- Aligning agents with real business needs

Data Readiness & Needs Analysis

- Defining required data sources and assessing readiness
- Identifying gaps in structure, quality, and access

Data Preparation & Modeling

- Ingesting, transforming, and structuring data
- Building semantic models for AI consumption

Agent & Interface Setup

- Configuring data agents and conversational interfaces
- Enabling interaction through chat, APIs, or tools

WHAT YOU GET

- ✓ Working data agents aligned to defined business use cases
- ✓ Connected data layer structured for effective AI interaction
- ✓ Semantic models designed to enable accurate, contextual responses
- ✓ Validated use cases prepared and ready for scalable deployment
- ✓ Clear path to production with defined steps and outcomes

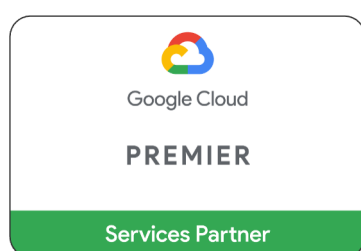

ENGAGEMENT OPTIONS

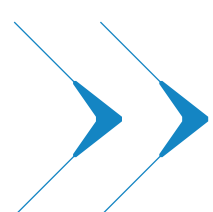

| | 3 agents 4 weeks | 5 agents 5 weeks | 10 agents 8 weeks |
|----------------|---|--|---|
| | STARTER TIER Immediate validation and testing | EXPANSION TIER Broader coverage across workflows | SCALE TIER Organization-wide enablement |
| 1 | Up to 3 data agents implemented | Up to 5 data agents | Up to 10 data agents |
| 2 | Focus on key use cases | Multiple use cases and data domains | Cross-functional use cases |
| 3 | Rapid setup and validation | Enhanced data modeling and integration | Advanced integration and orchestration |
| Outcome | Working proof of value with clear business relevance | Expanded capabilities with stronger business alignment | Scalable, robust foundation for enterprise AI interaction |

SOFTSERVE DATA & ANALYTICS EXPERTISE

SoftServe is a trusted partner for organizations pursuing data and AI-driven transformation. With extensive experience in analytics, AI/ML, and modern platform engineering, we build secure, scalable foundations that support enterprise growth.
