

DATA PLATFORM MIGRATION RESCUE

Get Your Migration Back On Track

OVERVIEW

Many data platform migration initiatives begin with clear intent but lose momentum due to complexity, unclear scope, or execution challenges. As timelines slip and costs rise, confidence in delivery declines. This service helps restore control by introducing structure, clarifying priorities, and defining a clear, actionable path to successful completion.

VALUE

Restore Delivery
Confidence

Reduce Cost
Overruns

Stabilize
Execution

Accelerate
Completion

WHY IT MATTERS

Migration delays persist without structured intervention.

Missed deadlines increase costs and strain resources.

Unclear scope leads to rework and inefficiency.

Poor coordination slows delivery and progress.

OUR CAPABILITIES

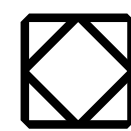

IDENTIFYING

the root causes of delays and cost overruns early

STABILIZING

scope, approach, and execution across teams

DEFINING

a clear, realistic path to successful project completion

WHAT WE COVER

Migration Scope & Drivers

- Clarifying objectives, scope, and success criteria
- Aligning migration goals with business priorities

Planning Artifacts Review

- Evaluating existing plans, assumptions, and documentation
- Identifying gaps, inconsistencies, and risks

Approach & Progress Review

- Assessing migration strategy, execution model, and progress
- Identifying bottlenecks and inefficiencies

Process & Delivery Audit

- Reviewing governance, roles, and delivery
- Identifying coordination breakdowns

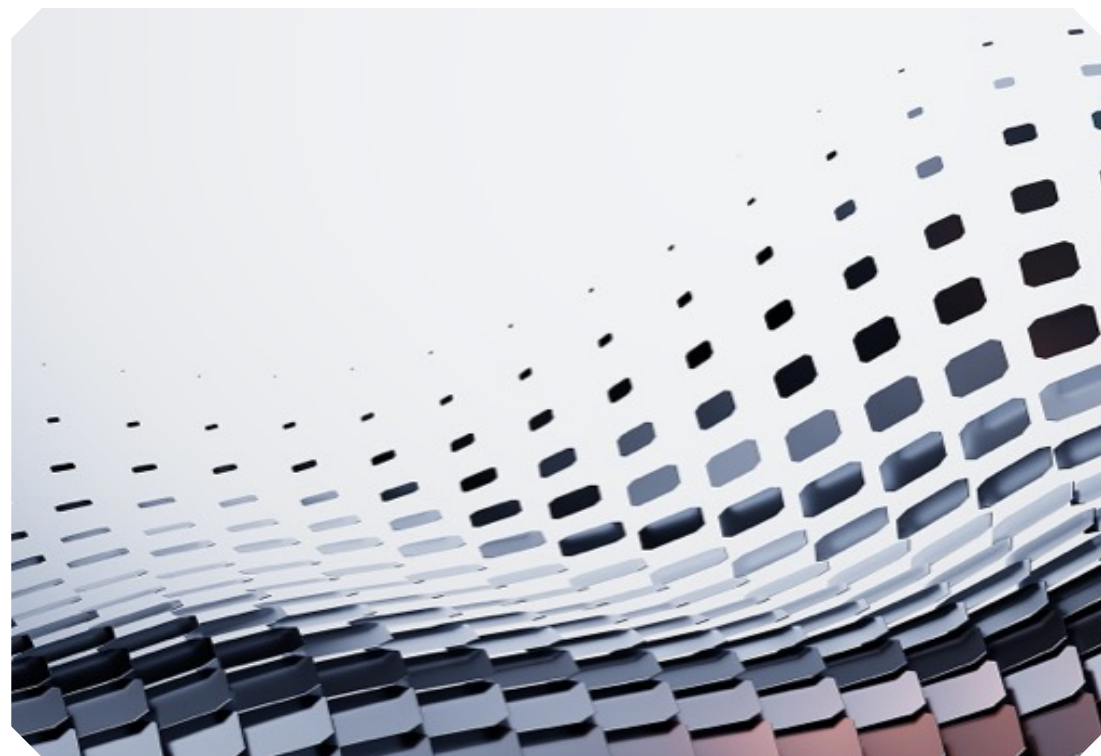

Rescue Roadmap Execution

- Defining a structured recovery plan
- Prioritizing actions to stabilize and accelerate delivery

WHAT YOU GET

- ✓ Root cause analysis of delays and overruns
- ✓ Stabilized migration approach aligned with reality
- ✓ Clear recovery roadmap with prioritized execution actions
- ✓ Improved delivery structure and governance model
- ✓ Realistic timeline and execution planning approach

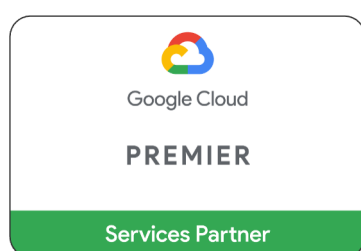

ENGAGEMENT OPTIONS

	4 weeks	6 weeks	12 weeks
	SMALL TIER Focused recovery of migrations	MEDIUM TIER Structured recovery and planning	LARGE TIER Complex enterprise migration rescue
1	High-level review of migration scope, progress, and delivery risks	Detailed review of migration workflows, architecture, and delivery processes	Enterprise-wide assessment across platforms, teams, and integrations
2	Identification of major blockers, dependencies, and execution gaps	Assessment of governance, execution model, and operational bottlenecks	Deep-dive review of architecture, scalability, and execution risks
3	Initial stabilization recommendations and recovery direction	Prioritized recovery roadmap with execution plan and delivery alignment	Recovery strategy with governance alignment and execution framework
Outcome	Clear understanding of what is going wrong and how to fix it	Validated recovery plan with actionable next steps	Enterprise-grade recovery program ready for large-scale execution

SOFTSERVE DATA & ANALYTICS EXPERTISE

SoftServe is a trusted partner for organizations pursuing data and AI-driven transformation. With extensive experience in analytics, AI/ML, and modern platform engineering, we build secure, scalable foundations that support enterprise growth.

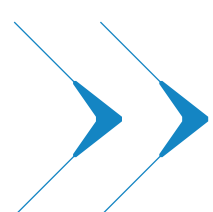

150+
Data & Analytics Projects for the last three years

500+
Data Engineers & Analysts

100+
AI & Data Science Experts

50+
Certified Data Architects
