

Modernize Faster with AI Powered SAMP + AWS

MODERNIZE 2-3 TIMES FASTER AND GET READY FOR AI

Modernization isn't just about speed. It's about building the right foundation for what's next. **Without strong foundations, nearly 80% of agentic AI projects fail.**

Platform engineering removes the complexity, giving teams self-service tools and automated workflows. You'll see **faster delivery, lower costs, and a secure, scalable base for AI adoption.**

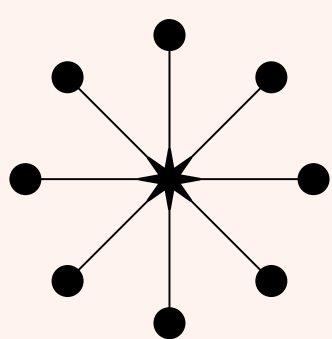

Instead of managing infrastructure, your teams focus on innovation and business outcomes, driving measurable ROI.

SWITCH TO PLATFORM FASTER

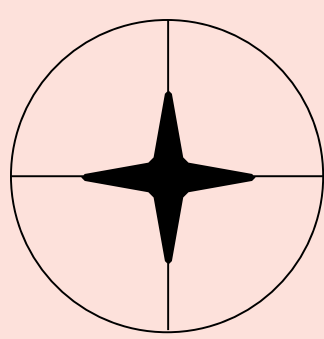

Switching to platform engineering takes time, talent, and coordination across teams. SoftServe Adaptive Modernization Platform (SAMP) is one example of a platform that helps you switch faster.

SAMP, enhanced by AI-driven engineering with Q (AIDEEQ), delivers repeatable, AI-powered modernization at scale using AWS-native services like Transform, Amazon Q, and Bedrock Agents.

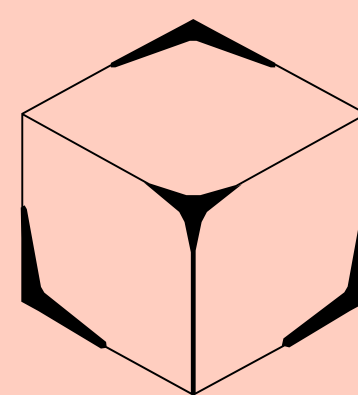

SAMP AND AIDEEQ FEATURE

Enterprise-grade scalability and security: Built to grow with your business.

Customizable PaaS: Integrates with any CI/CD pipeline for faster delivery.

Repeatable, AI-powered solutions: Uses Gen AI and reusable patterns across teams for speed and consistency.

AWS PARTNERSHIP AND VALIDATED SOLUTIONS

30+ years of enterprise expertise and 10+ years of AWS collaboration ensure proven, end-to-end solutions.

Powered by AWS best practices and our experience as an AWS Premier Tier Service Partner, we'll help you choose the right architecture. The right foundation ensures a secure, scalable base for AI adoption.

SAMP + AIDEEQ BENEFITS

SAMP and AIDEEQ give you speed, scalability, and AI-ready capabilities.

Less than 20

min to deploy easy and fast

Up to 5x

reduced time-to-market for new features and services

Up to 30%

lower cloud infrastructure costs

20% - 30%

using Gen AI and Agentic AI

Customize structure to meet specific business needs

Lower costs by only paying for what you need

Optimize operations with streamlined processes

Standardize workflows and applications to increase efficiency

Maximize resource usage and scalability to accelerate innovation

Ensure global security standard compliance

Improve disaster recovery with clear protocols

Faster time-to-market with build once-deploy-many model

Reduce hands-on maintenance demands

PARTNERSHIP

[SoftServe](#) is a Premier Tier Services Partner in the AWS Partner Network, delivering end-to-end cloud solutions that accelerate time-to-value and ensure alignment with AWS Well-Architected best practices. With over 700 AWS-certified experts and deep industry expertise across finance, healthcare, retail, and manufacturing, SoftServe helps enterprises modernize applications, optimize data strategies, and adopt AI-driven innovation. In 2023, AWS introduced Foundational Technical Review (FTR) for partner services. SoftServe was selected as the first pilot partner for service offerings. FTR certified SAMP as meeting all foundational criteria.
