

Modernize Microsoft Workloads Fast: Cut Costs, Unlock AI

Reduce microsoft licensing costs by up to 50% and get your apps AI-Ready up to 90% faster.

Legacy Microsoft workloads slow down innovation and drain budgets. Traditional modernization takes months or years, limiting agility and delaying ROI. The SoftServe Microsoft Modernization Framework changes that.

BUSINESS VALUE

Fast ROI and future-ready apps without the usual pain of modernization.

FROM 3X TO 15X

Better performance (server-side workloads, garbage collection, serialization, startup, multithreading) and better memory use

AT LEAST 50%

Infrastructure cost reduction (cross-platform, reduced memory consumption, CPU-optimized runtime)

RAPID ONE DAY APPLICATION ASSESSMENT

With CAST Highlights

70%-90% FASTER APP MODERNIZATION

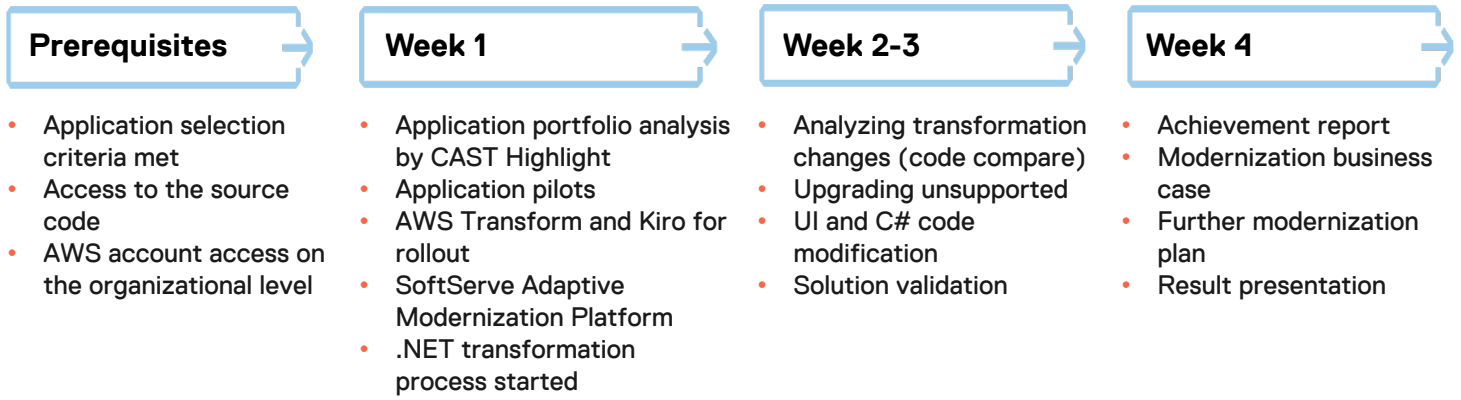

Using AWS Transform feature to modernize .NET workloads

IMPROVED SECURITY MODERNIZATION

Protection against OWASP Top 10 in critical areas

Archer achieved 3x faster Microsoft workload modernization

APPLICATION SELECTION CRITERIA

LEARN MORE ABOUT SOFTSERVE + AWS PARTNERSHIP

IDEAL CANDIDATE

- Console application
- Class libraries
- Web API
- Windows Communication Foundation (WCF)
- .NET Framework <= 4.8
- .NET Standard
- XML Config to appSettings.json
- C# Code in Web Projects

REQUIRES MORE EFFORT

- ASP.NET Razor Pages Views
- ASP.NET Web Forms Views
- Visual Basic
- Non-default IIS configurations
- More than 100k lines of code
- Private NuGet packages not supporting the target .NET version (for example 8.0)
- Entity Framework to EF Core
- ASP.NET Model View Controller (MVC) Views
- Single Page Application (SPA)
