

Ship AI Fast, Without Skipping The Rules.

ATLAS is SoftServe's production-ready AI operating framework, built on Microsoft Foundry and Azure, that takes you from isolated experiments to governed, enterprise-scale AI delivery.

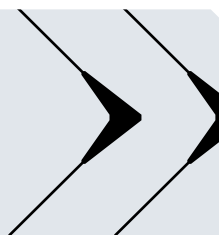

GOVERNED SECURE SCALABLE

You have AI experiments. The gap between a working prototype and a production system your security team, compliance officers, and board can stand behind is where AI investment stalls. When teams build AI without a shared foundation, the result is fragmented projects, inconsistent security, and audit exposure.

WHAT THE ATLAS FRAMEWORK MAKES POSSIBLE

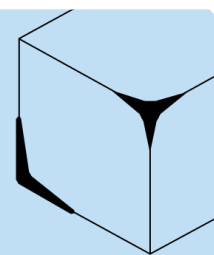

STOP REBUILDING THE SAME APPROVAL CHAIN FOR PROJECTS.

ATLAS gives every new project a pre-built, approved foundation. Your teams deploy AI two-to-four times faster because the infrastructure, security model, and governance controls are in place.

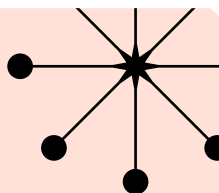

GIVE YOUR SECURITY TEAM ONE THING TO SIGN OFF ON.

ATLAS enforces consistent security and compliance posture across every team, project, and environment. Fewer fire drills for security, and complete audit trail for your board.

ADD A TEAM WITHOUT A NEW GOVERNANCE CONVERSATION.

ATLAS standardizes how AI is built, governed, and operated across your organization. Each new initiative inherits a proven model. Duplication drops, while velocity compounds.

2–3x

FOR ANY SCALE

- ◆ STARTUPS AND ISVS
- ◆ ENTERPRISES
- ◆ INNOVATION TEAMS
- ◆ REGULATED INDUSTRIES

ENGAGEMENT OPTIONS

TIER 1

SECURE START

\$11,000 | 2 WEEKS

Best for: Your team needs a secure, approved AI foundation. No long procurement cycle or months of architecture decisions before you write a line of code.

Outcome: A production-ready AI environment on Azure: identity, access, and security controls in place.

TIER 2

PRODUCTION BASELINE

\$60,000–\$90,000 | 4-6 WEEKS

Best for: You have AI use cases ready to ship. You need a deployment pipeline that your security and compliance teams will approve and engineers can repeat.

Outcome: A governed, multi-environment AI platform with controlled promotion from development to production.

TIER 3

GOVERNED PLATFORM

FROM \$200,000 | 12+ WEEKS

Best for: AI is a strategic priority across your organisation — multiple teams, multiple domains, regulated environments. You need a platform your whole enterprise can build on.

Outcome: A continuously governed, enterprise-wide AI platform. Every team builds on the same secure foundation.

LONG-TERM MICROSOFT PARTNERSHIP

SoftServe has delivered over 1,000 Azure projects as a Microsoft Solutions Partner since 2004. Our 300+ Azure-certified professionals have taken AI from proof of concept to production in regulated industries, global enterprises, and high-growth technology companies.

We hold Microsoft Solutions Partner designations across AI Platforms, Cloud Security, Infrastructure and Database Migration, Digital and App Innovation, and Kubernetes on Azure. Three of our engineers hold Microsoft MVP recognition.
